OBJECTIVE

Proven problem solver and strong communicator with a 4-year Computer Science degree and 3 years of experience. Through my time at Fox Dealer I've gained real-world experience collaborating with clients and team members to provide working solutions through code and problem solving. I am looking to broaden my skills into new technologies and projects.

WORK EXPERIENCE

Fox Dealer, *Software Engineer*

August 2021 - Now

Collaborated with clients and other engineers to manage and expand a vehicle reservation payment system and dashboard to help 400+car dealers manage potential customers.

Maintained, improved, and developed modules for legacy CMS and internal tooling responsible for serving 300+ websites.

Built out automated inventory file delivery systems and UI responsible for sending data to third parties using JSON templates and cut down needed development time by 90%.

Optimized legacy CMS dashboard used by internal teams and clients to cut down load times by 50% in order to increase business efficiency.

Help investigate and successfully reach solutions for 2000+ tickets including bug fixes, new features, and improvements.

Documented software changes and tooling functionality for use by 30+ employees including engineers, support members, and managers.

EDUCATION

California State University of Bakersfield, Computer Science Undergraduate

Fall 2017 - Spring 2021

Dean's List Recipient: Fall 2017 - Spring 2021

GPA: 3.770
